About Us

Badoo.com is an online community with 50 million registered users worldwide and continuously growing.

We are all about meeting new people in and around your local area, making new friends and creating encounters!

We are quickly expanding throughout all Europe and in the rest of the world, and have set up a brand new mobile team in the last 6 months. Our mobile application brings Badoo to life on our customer's phones using location as well as all the familiar features of Badoo online..

This is a fantastic opportunity for an experienced i-phone developer/Architect to join our company just at the point where we are leaping into the world of mobile!

Person Description

This is somebody who is passionate about creating innovative mobile applications.

This person is an exceptionally experienced and impressive coder who has a real passion for what they do. They may develop applications in their own time (this is not just a job to them), and they may have won awards or competitions for their work.

They will already have designed and launched a number of iphone applications in the app store and are very familiar with the iphone sdk.

They should be able to demonstrate their innovative UI design and development skills and understand what makes an app addictive and appealing.

Key Skills

- A systematic approach to application integration
- Familiar with interactive application development paradigms, memory management, file I/O, network & socket programming and concurrency
- In-depth debugging skills; ability to use team strengths to solve problems.
- Defensive coding ability accompanied with strong analytical and creative problem solving skills.

Key Experience

Essential

- iphone development - at least 1 year, including launched applications
- client-server experience
- Very good object oriented design experience
- Agile software development experience

Desirable

- Location Based Services on mobile
- Knowledge of the i-phone three20 libraries
